A PORTABLE TERMINAL APPARATUS, A GAME EXECUTION SUPPORT APPARATUS FOR SUPPORTING EXECUTION OF A GAME, AND COMPUTER READABLE MEDIUMS HAVING RECORDED THEREON PROCESSING PROGRAMS FOR ACTIVATING THE PORTABLE TERMINAL APPARATUS AND GAME EXECUTION SUPPORT APPARATUS

This application is a division of US Application No. 09/903,574, now Patent No. 6,764,399, filed July 13, 2001

BACKGROUND OF THE INVENTION

1. Field of the Invention

The present invention relates to a portable terminal apparatus which enables a player to play a game, and relates to a recording medium, such as a computer readable medium, having recorded thereon a processing program for activating the portable terminal apparatus. Further, the present invention relates to a game execution support apparatus for supporting execution of a game, and relates to a recording medium, such as a computer readable medium, having recorded thereon a processing program for activating the game execution support apparatus.

The present application is based on Japanese Patent Application No. 2000-234512, which is incorporated herein by reference.

2. Description of the Related Art

There has hitherto been proposed a system which enables a player to play a game while information is exchanged bidirectionally between a server and a portable terminal apparatus, such as a portable
